

EUCLID LIGHTING

Company Profile

About us

Euclid Lighting stands out as a premier manufacturer of high-quality architectural lighting for both interior and exterior settings.

Our extensive portfolio features energy-efficient and visually appealing lighting products, complemented by robust lighting design and engineering capabilities.

With a commitment to innovation and the latest technology, we deliver unique lighting solutions that consistently exceed customer expectations.

Whether for residential or commercial applications, our focus on quality and aesthetics sets us apart in the industry.

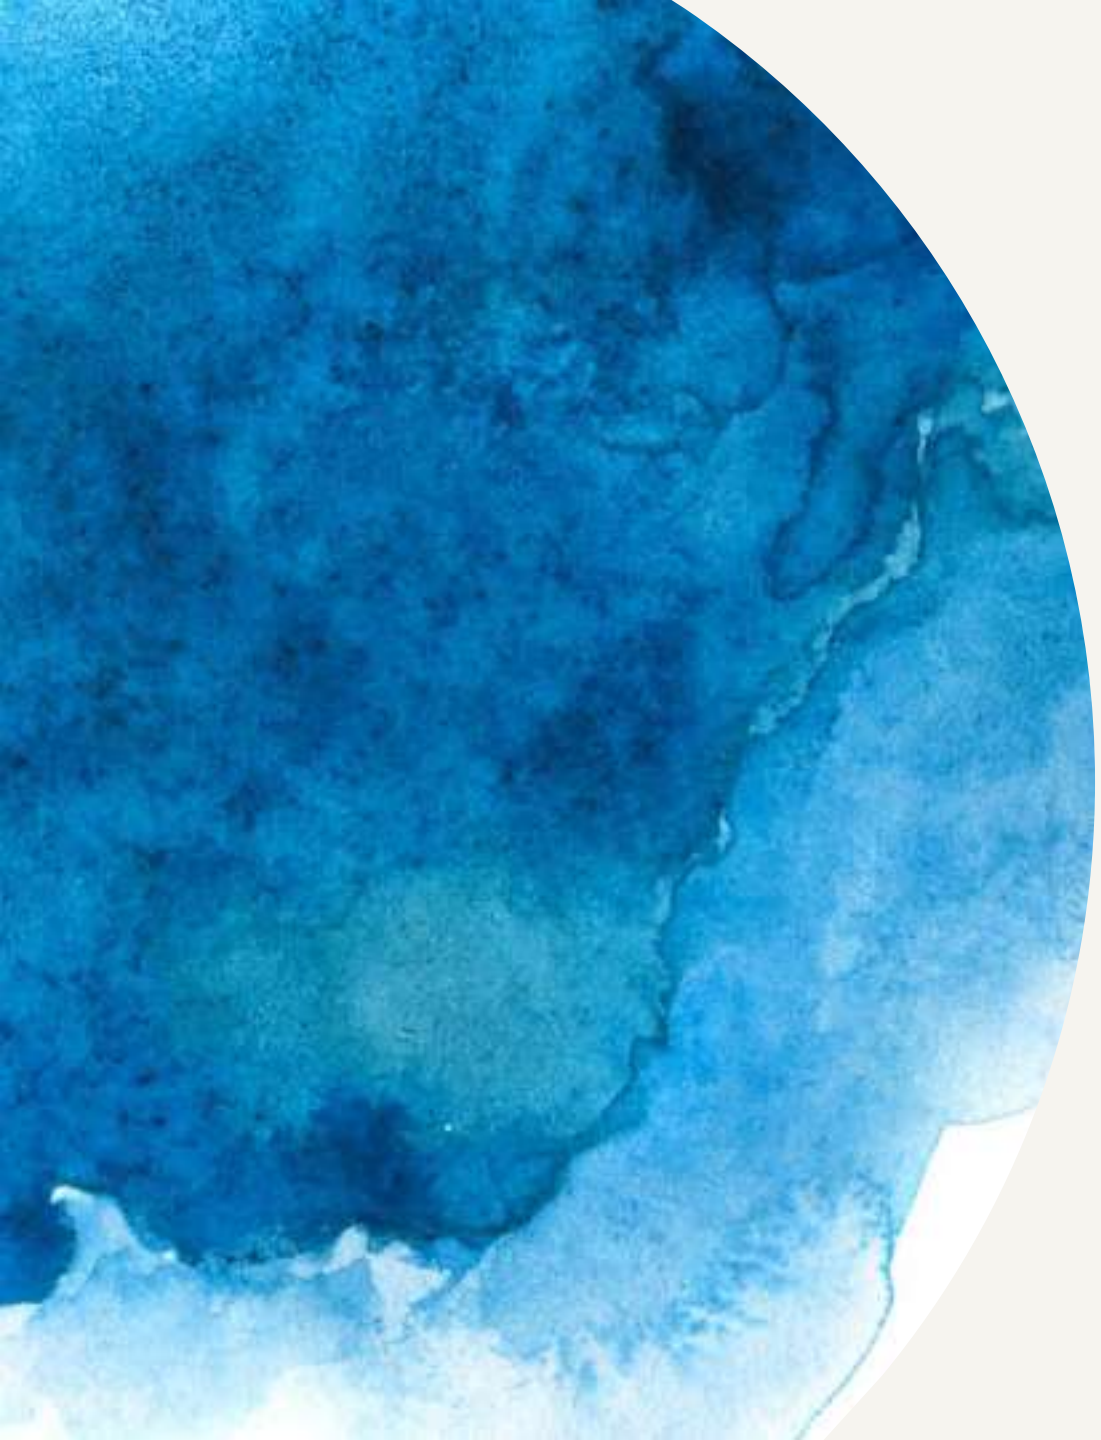

Our History

Founded in 2010, Euclid Lighting is the result of a dedicated team of professionals with a deep passion for LED technology.

Our team bring years of expertise in LED research, product development, and marketing, allowing us to create innovative lighting solutions that reflect our commitment to quality and performance.

This rich background enables us to stay at the forefront of the industry, continuously delivering exceptional products that meet the evolving needs of our customers.

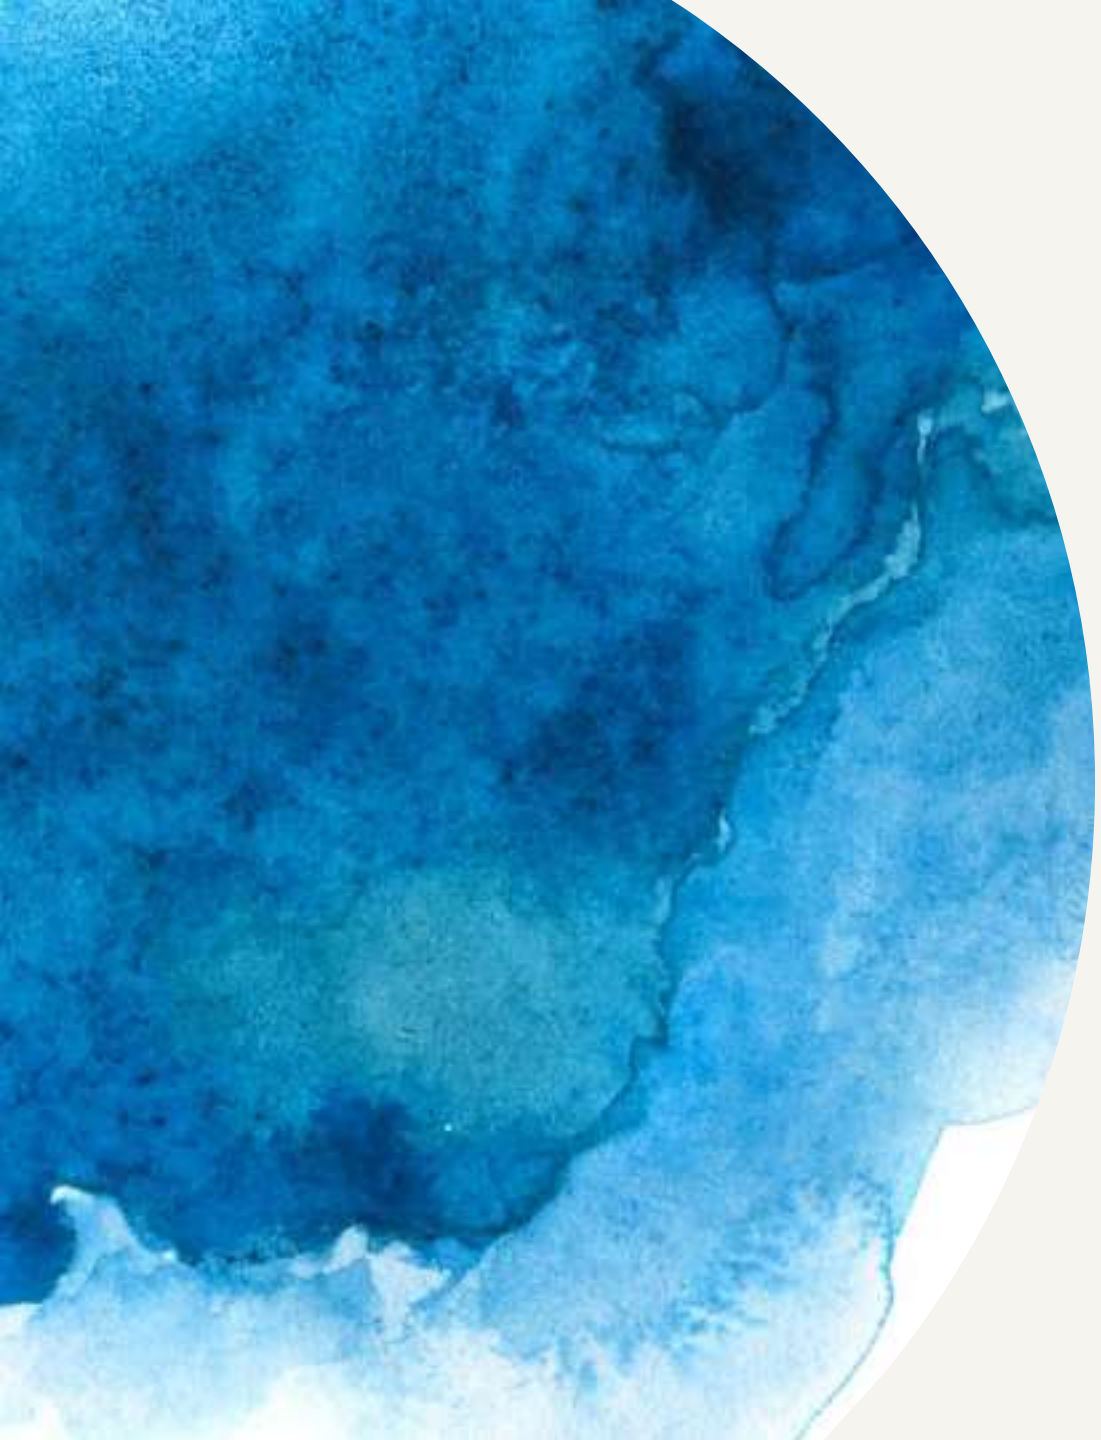

Our Values

We prioritize innovation over large-scale production. Our strength lies in our ability to transform new ideas into reality, fostering effective communication between concepts and execution.

With a commitment to perfecting our manufacturing processes and a keen understanding of light and shadow, we collaborate closely with designers and lighting architects on a variety of iconic and interactive projects.

Our Vision

Our artistic approach allows us to redefine the relationship between people and their environments through light, enriching the architectural experience and awakening its inherent spirit.
